

Our pit display, fun with an astronaut for Rover Ruckus, we also set up a Raspberry pi and monitor with our Volunteering Workshop presentation displayed.

It was very exciting to have our Tournament at Rackspace. They livestreamed our matches on the KSAT News website! We played our best, focusing on the most points with landing and lifting and didn't lose a match, even when we had 2 rounds with partners who had disabled robots and did not play.

Our first time being an Alliance Captain. We were in 1<sup>st</sup> Place going into the Semi-Finals and Finals!

All our hard work this season won the 1<sup>st</sup> Place Winning Alliance, Inspire 3<sup>rd</sup> Place, Connect 1<sup>st</sup>, Motivate 2<sup>nd</sup>, and Control 2<sup>nd</sup> Place awards! We also advanced to the Regional!

Winning Alliance: our team, Lutheran Robotics Mechanical Mustangs, and Roosevelt Bushbots
